DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over van den Brink (US 4778275), (herein after 275) in view of JP 6-302495, Shigeo (herein after Shigeo).

With respect to the claims 1-11 the rejections are respectfully maintained and incorporated herein by reference as set forth in the prior office action dated 1/21/2005.

Response to Arguments

4. Applicant's arguments filed 6/6/2005 have been fully considered but they are not persuasive. Applicant argues that the reference fails to disclose "measure a displacement ... move the object and a first object table", as claimed in claims 1 and 11. examiner disagrees, the limitation of "measure a displacement ... move the object and a first object table", is taught by the reference '275 in col. 8, lines 55-64. also, applicant argues that the reference fails to disclose or suggest moving the mask and the mask table relative to each other. The examiner would like to point out that the limitation moving the mask and the mask table relative to each other, is not claimed in any claims. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, reference '275 discloses object place on first position, measuring a displacement, removing the object, moving the object and the table relative to one another and placing the object at the

required position, (see col. 7, lines 24-40, the mask "object" is at the first position and the system AS1 aligns the mask by positioning the mask at the required position, see col. 7 line 64 through col. 8 line 5), as claimed. And, reference Shigeo teaches removing the object from the first object table, (see the constitution the reticle 12 is taken out "remove" and the stage is turned) as claimed. It would have been obvious to one ordinary skilled in the art at the time of invention to combine the two references as they are analogous because they are solving the similar problem of lithography. The object removing system of the Shigeo can be place in to the 275, in order to accurately align the reticle at a high speed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
